

Becketwell Performance Venue

What will it look like

The building is being designed to meet the needs and expectations of the modern events market, creating a new standard for how mid-size venues can operate. The venue's capacity means it can attract a large range of touring acts and shows that historically would not have considered Derby.

It sits within a carefully considered masterplan for Becketwell featuring a new public square and improved highway network to minimise any disruptions and challenges and maximise the value of the venue as a tremendous asset for the city and its residents.
